OK. Here is my opinion.

Change "a machine readable medium containing one or more programs" to -- a computer readable medium storing one or more computer programs --. Right now, we decided to follow the guideline closely. We know the suggested language above is accepted in the guideliine (see page 53 of the guideline). We will not accepted anything outside of that.

Mr. Peng,

I have a chane to talk with Wellington and read the interm guidelines, and he suggested amending "machine" to --Computer-- that would overcome the 101.

He also want me to check with you to make sure this is proper.

Thanks,
Bob Phunkulh

Please look at claims 21 to 24. Please consider claims in light of interim guidelines for statutory subject matter.

Thanks, Rein

Subject: Business Methods Case you sent me

John, could you look at claims 21 thru 24. I think 101 problem. Should not issue case yet! (09/896,201)

"Machine readable medium" ; program per se...
